MATERIA NEL TEMPO

INTRO

TRAME DI PIETRA si conferma come un progetto in continua evoluzione.

Sempre nuovi effetti di superficie prendono forma su lastre di pietra e marmo naturali per pavimenti e rivestimenti. La flessibilità della tecnica permette la realizzazione di nuove texture e nuovi decori su innumerevoli materiali, incontrando la creatività di designer e architetti per la realizzazione di progetti custom made.

TRAME DI PIETRA is a continuously evolving project.

New surface effects on slabs in natural stone and marble are proposed for flooring and wall coverings. New textures and patterns are continuously created on an unlimited number of materials, thanks to the flexibility of the technique, giving new opportunities to architects and designer for bespoke projects.

Il concetto delle Trame prende sempre più la forma del pavimento in pietra.

La materia pietra viene trasformata mantenendo la sua natura, senza essere alterata, con microincisioni che creano superfici tono su tono con effetti di luci e ombre, idonee per pavimenti e rivestimenti.

Sei le nuove texture introdotte nella collezione 2018 che si uniscono a Sacco e Tessuto, presentati con una nuova forma ed un nuovo aspetto, sempre più materico.

TRAME DI PIETRA offers a new perspective on stone flooring surfaces.

The technique transforms the material, without altering its nature, creating micro-engraved surfaces “ton sur ton”, with lights and shades effects, suitable for flooring and wall coverings.

The 2018 collection presents six new textures in addition to Sacco and Tessuto, revised and presented with a new look.

MARBLES

MATERIALS

Bianco Carrara e Bardiglio Imperiale: questi i materiali scelti per la nuova collezione.

Il design sposa il marmo con effetti di microincisione che attribuiscono ai pavimenti ed ai rivestimenti una nuova identità, con il plus di una caratteristica tecnica dell'antiscivolo che rende queste superfici ideali per pavimentazioni di ambienti interni ed esterni quali bagni, spa e piscine. Linee che si intrecciano, formando effetti tridimensionali, e veri e propri disegni su marmo dando vita a dodici nuovi decori proposti su marmo con finitura opaca.

carrara

bardiglio

Carrara and Bardiglio Imperiale marbles are the materials proposed for the new collection.

Surface effects that give marble flooring and wall coverings a new perspective, both aesthetic and technical: the micro-engraving creates anti-slip floorings with new and unique textures and patterns, suitable for indoor and outdoor applications, such as bathroom, spa, wet rooms, and pools.

Lines shaped to create three-dimensional effects and new patterns give birth to twelve new designs proposed on marble, with a matt finish.

LE TEXTURES

CUSTOMIZE

THINK, DESIGN, CREATE.

Trame di Pietra è un progetto la cui parola chiave è “customizzazione”.

A supporto delle esigenze di progetto, i formati standard si alternano ai formati “cut to size”. Grazie alla continua ricerca, ai materiali in collezione si aggiungono sempre nuovi marmi e nuove pietre. La flessibilità della tecnica e la sperimentazione continua portano alla creazione di nuove texture e decori personalizzabili, offrendo infinite opportunità per i progetti custom made. Un approccio creativo e flessibile che, nel dialogo costante con architetti e designer, dà vita ad innumerevoli applicazioni nel campo dell’architettura d’interni.

La realizzazione di micro-incisioni su lastre di marmo e pietra di grandi dimensioni fino a cm 100x250 si rivela uno strumento innovativo ed idoneo per la realizzazione di lavori su misura a supporto di studi di progettazione e laboratori di marmisti.

I progetti spaziano dalla realizzazione di pavimenti e rivestimenti per ambienti living, cucine, bagno, spa e piscine fino al settore dell’arredamento, con la creazione di tavoli, mobili e lampade.

Trame di Pietra is a project where the key concept is “customization”.

Surfaces move from standard sizes to cut to size to support custom made project needs. Thanks to the continuous research, new stones and marbles are continuously proposed in the collection of materials. The flexibility of the techniques used for transformation, coupled with the continuous testing, allow the creation of new customized textures and patterns, providing limitless opportunities for bespoke projects.

This innovative and flexible approach meets the creativity of architects and designers to give birth to unique and unprecedented applications in interior design.

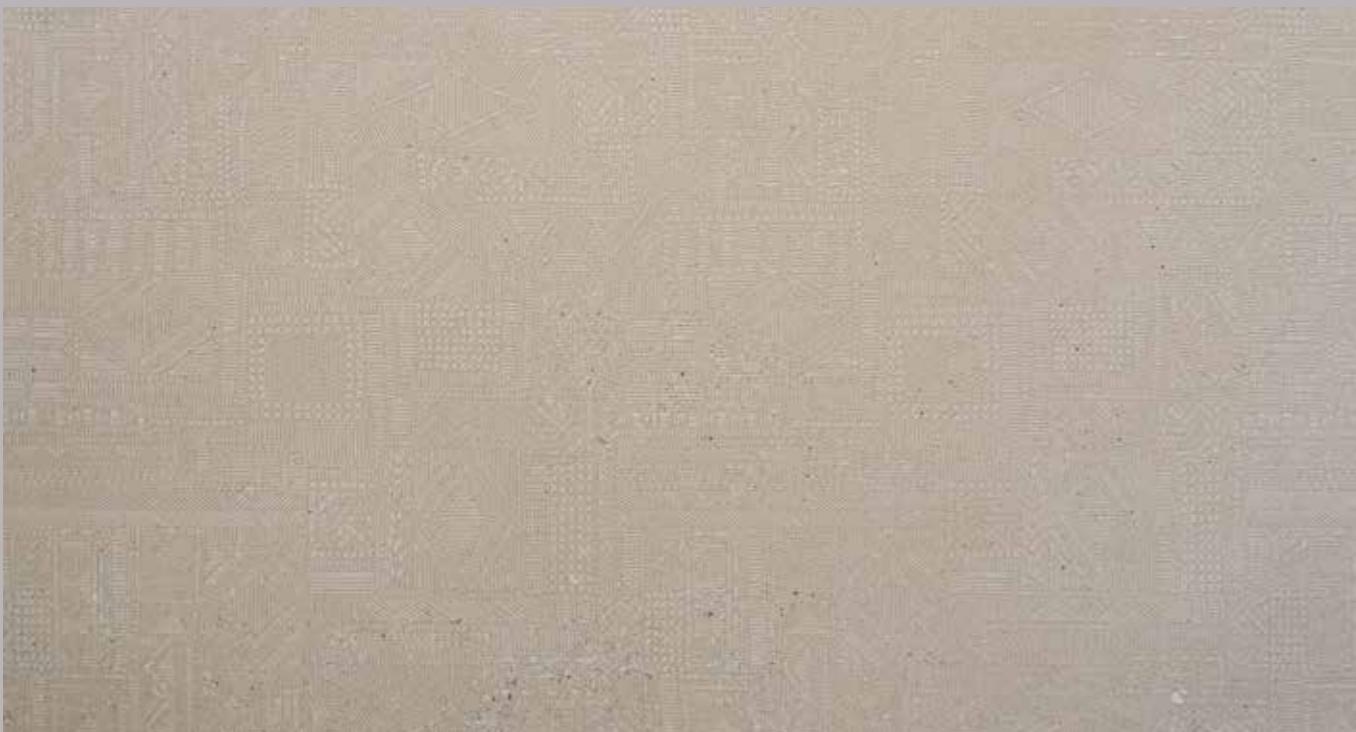

The transformation of micro-engraved big size slabs in stone and marble up to cm 100x250 is a key innovative instrument which offers unique opportunities to marble laboratories, architects and designers for bespoke projects.

Projects may span from flooring and wall coverings for living rooms, kitchen, bathrooms, spa, wet rooms, swimming pools up to interior design, such as tables, furniture and lamps.
